[a] Total labor force by place of residence, including workers involved in trade disputes. Employment includes self-employed, unpaid family, and domestic workers.

[b] Range as shown is at the 90% level of confidence.

NOTE: These labor force data are supplied by the U.S. Department of Labor.

HIGHLIGHTS California's seasonally adjusted unemployment rate for December was 7.1 percent, up from the 6.7 percent in November. A year ago, in December, the rate was 5.3 percent. During December in California, seasonally adjusted employment decreased by 5,000 over the month while unemployment increased by 64,000. The number of job losers decreased from 489,200 in November to 485,300 in December. The number of job leavers decreased by 6,900 during the month. The national civilian seasonally adjusted unemployment rate for December was 6.1 percent, up from the 5.9 percent in November.

Total nonagricultural wage and salary employment, not seasonally adjusted, increased by 46,300 from 12,888,700 in November to 12,935,000 in December. The largest increase in employment was in the trade sector with a gain of 42,700 jobs; however, this was less than seasonally expected. Other sectors that recorded increases were services with 14,400 additional jobs; finance, insurance, and real estate with 2,300; transportation and public utilities with 2,000; and mining with 100. After adjusting December's data for seasonality, rather modest employment growth was noted in four of the eight major nonagricultural sectors. The largest increases occurred in the government and services sectors with identical gains of 3,100 jobs; small increases were also recorded in finance, insurance, and real estate, and transportation and public utilities. The largest decrease occurred in the trade sector with most of this reduction in the retail trade component. Job losses in the manufacturing sector were spread throughout most of the components in durable goods; this marks the ninth consecutive month that seasonally adjusted employment in manufacturing has decreased. Since December 1989, total nonagricultural wage and salary employment, not seasonally adjusted, has increased by 130,500, a gain of 1.0 percent over the year. During November, average weekly earnings and average weekly hours worked in manufacturing increased to $475 and 40.7, respectively.

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Economic Information Group, P.O. Box 826880, Sacramento, CA 94280-0001.

*Because of a relatively small sample, the monthly estimates for data in Table 2 do not always appear to reflect real labor market conditions. Therefore, these figures are a three-month moving average instead of monthly data. For example, July's data are an average of May, June, and July. August's data are an average of June, July, and August.

Prepared in cooperation with the Bureau of Labor Statistics and the Employment and Training Administration of the U.S. Department of Labor by the Labor Market Information Division, Economic Information Group, P.O. Box 826880, Sacramento CA 94280-0001, (916) 427-4660

FOOTNOTES TO TABLES

* Data not published on the 1972 SIC code. This is a new composition of the industries included or the industry is new.

** Data for 1988 and 1989 are not comparable with prior data because of the SIC code revisions (changed from the 1972 SIC code to the 1987 SIC code).

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees at the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings. Figures for the current month are preliminary and are subject to revision.
